

## Top-Up Programs with Qualifi

Students at Geneva Business School campuses have the opportunity during the third year of their Bachelor Program or during the third semester of their Master Program to participate in the Top-up Degree Program at a UK university via our partner Qualifi.

Geneva Business School Students at bachelor and master levels can choose to study for an additional qualification via our academic partners in the UK, Qualifi. This allows students to access programs offered by various universities in the UK. All of the universities listed offer programs of varying lengths at different levels of cost. Students can choose the option that best suits their personal circumstances.

- To access the Bachelor level top-up, students must have 120 ECTS credits.
- For the master level top-up, students must have 60 ECTS credits.

A student who wants to apply, but is waiting for results of exams or other assignments will have to wait until they can clearly show they have met the credit entry requirements for the top-up programs. Students who undertake the top-up programs are treated by their chosen UK university in the same way as on campus students and can access online facilities for the duration of their time of study.

When the student successfully completes the top-up program, Geneva Business School will recognize we will accept the credits gained and include them on their student transcripts.

Currently Qualifi is offering access to **Bachelor programs** at the following universities:

- The University of Lincoln
- Anglia Ruskin University
- University of Worcester
- University of Wolverhampton

Currently, Qualifi is offering access to **Master programs** at the following universities:

- The University of West of Scotland
